

NEOPOR HIGH PERFORMANCE FOAM GENERATOR BK - 8

Aircompressor :	HYDROVANE rotation compressor	
	Effective air-supply	821 l/min
	Operating pressure	8 bar
	Electric motor	5,5 kW, 1400 rpm
	Fuse	IP 44
	Oilchange	every 400 hours
Gear-motor	PLANETROLL, Electric motor	
	Adjustable by push-button driving small electric motor	2,5 kW

Side-channel Pump : SIHI HALBERG

Electric system : 380 V, 50 cycles

Performance : The rotation compressor supplies at any time the full amount of air of the required pressure up to 8 bar. The pressure and volume of air produced is set at the factory and does normally not require adjustment . The weight of the foam is governed by the amount of liquid supplied by the SIHI liquid pump, adjustable by the geared motor. The correct weight is set by pus-button, driving a small electric motor, adjusting the gear.
